

# PROJECT MANAGEMENT & INSTALLATION

- Contact persons before, during and after the project
- Mechanical and electrical installations
- Deinstallations and cable work
- Weekly project status
- Organisation of all work
- Continuous contact with customers and suppliers
- Professional project management from A-Z

We offer project management and installation so that our customers have the opportunity to realise a project without own personnel.

We take over the planning and organisation of the steps to be taken and coordinate customers and suppliers. For mechanical and electrical installation, we work together with experienced partners who work professionally and on time.

Weekly project status reports provide information on current status. We are your contact partner at all times and monitor construction sites personally.

With project management by Detlef Kaul Handelsvertretung GmbH, your project will be realised professionally.

## CAREFUL PLANNING AND PREPARATION

## MACHINE CONTROL

### 3-layer blown film line

**Week 1:** Dismantling and assembly/construction control cabinet, mounting plates, hopper frame inspection, signal recording
